Subject: RE: Private Wells near Northwestern Landfill

Hi

Cory Willis is my contact at Claywood Park. His # is 304 422 1675

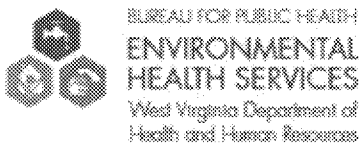

Mineral Wells is also in this area. I'll be at their office Friday 5/19. 304 489 2915. Mr. Byers is my contact

Have you contacted the local Wood county/Mid Ohio Valley Health dept? Liz Green is my contact: 304 485 7374. They would know about and manage private wells

Hope this helps

Bob

Subject: Private Wells near Northwestern Landfill

Good afternoon Bob,

My name is Kevin Rowsey and I work out of the U.S. EPA Region III office in Philadelphia. I'm currently working with the Chemours Company and their contractor, AECOM, to identify PFOA contaminated

drinking water sources in and around the Chemours owned Washington Works plant near Parkersburg in Wood County. Under our Amended Administrative Order on Consent, the Chemours Company must identify all PFOA contaminated drinking water sources in the Parkersburg area (both public and private) and offer alternative drinking water to those residents.

AECOM is having some trouble identifying which residents have public and private wells around the I-77 corridor near the Northwestern Landfill. We had some high PFOA levels near Upland Road but they can't find any other private wells in that area. AECOM staff have contacted residents in that area and many of them have said that they were all mandated to connect to public water in that area due to the landfill. Do you have any information regarding this mandate?

We've attempted to contact Claywood Park PSD (PWS ID: WV3305402) to ask about their distribution lines but they've been unresponsive.

Any information you can give me about the history behind the landfill mandate or private wells in that area would be very helpful.

Thank you,

Kevin Rowsey
